

Korrvu® Suspension Packaging

Suspension Packaging System

- Suspends products in the airspace of the shipping container between two layers of highly resilient, low slip film.
- The patented design suspends products away from impact, providing consistent protection for fragile products even after repeated drops.
- Includes inner assembly and outer packaging.
- Laptop system includes: 2 suspension inserts, accessory divider and outer box.

Sealed Air

At the packaging station, the frame is assembled and placed in the box to suspend the product in the center of the container.

The top window is placed over the product, completely suspending the item between two strong, flexible, low-slip films.

The box is closed, creating tension that holds the product securely between the two suspension windows, protecting it from shock.

Korrvu® Suspension Packaging

Stock Number	(L x W x D) (Inside Dimension)	Suggested Uses	Quantity Per Bundle
KOR105	12" x 10" x 5" NEW!	Digital Cameras & Small Electronics	5
LAPTOP	17" x 17" x 8"	Laptop Computers	5

Korrvu® Retention Packaging

Retention Packaging System

- Holds product securely within its proprietary retention frame and revolutionary film membrane.
- Provides engineered protection for a wide range of applications.
- Includes inner assembly and outer packaging.

Sealed Air

The side flaps fold upward, loosening the film and forming an "insertion pocket" for easy product loading.

The side flaps are folded down to tighten the retention film and hold the product securely in place.

The finished package is easily inserted into the carton and is ready for shipment.

Korrvu® Retention Packaging **NEW!**

Stock Number	(L x W x D) (Inside Dimension)	Suggested Uses	Quantity Per Bundle
KOR106	7½" x 5½" x 2"	Circuit Boards & Replacement Parts	5
